

## Community center

New hub building to gather social features in one place.

**Intention:** spare HUD space and gather all social features in one place

**Player interest:** having all social features in one place for better clarity

- Unlocked when player has visited 02.01 once
- Player can place it whenever and wherever he wants like a house or a factory
- Tutorial only starts when player has placed the building so that new and old players will see it
  - Tutorial is a fake visit of a premade hub introducing Hub Visits and Community Chest
- Interacting with the building opens Social UI which grants access to:
  - Hub visits
  - Social Points Shop
- Community Center building's occupied space on the hub grid must include Community Chest's dedicated space with it, but the chest won't be shown if on one's own hub
