

Material Requests

Players can request materials from their visitors who will receive social points in return.

Intention : emphasize players mutual aid and organisation among player groups

Player interest : gather ressources of their choosing without farming AND get rewarded for ressources you donate to a player

- Requests are located in Community Center's Drop Box
- Other players' requests can be seen while choosing a destination in Hub Visits
- Players can only request materials they already had once to avoid breaking progression curve
- To complete a request, players must visit the requesting player's hub and deliver all materials at once in their Community Center's Drop Box (not able to donate at all if material amount is insufficient)
- Players can only complete 3 requests per day
- Fake player requests should be generated using already existing player hubs to always have a base of requests to fulfill and earn social points
- Requests should be automatically fulfilled after a set time to avoid requests never getting completed
- Feature is unavailable while offline
