

Order board player requests

Players can leave a material request on their order board for other players to complete. Feature is unavailable while offline.

Intention : emphasize mutual aid between players

Player interest : getting required materials without having to farm them AND getting rewarded for giving materials to another player

Ref(s) : *Clash of Clans (troop donations)*

- Two kinds of requests : public requests (shown to everyone) and Friends requests (shown only to Friends)
- Both kind of request can be active at a time and are independant
- Players can only see and complete 3 random public requests and 3 random friend requests per day. These can be refreshed using gems or RVs.
- Players can set their own requests at their order board
- Each material has a max request number limit depending on how rare it is
- Players can only request materials they already obtained once
- There is no timer on a player request
- Players who have their request completed or remove their request to change it have a 1 hour cooldown before posting a new one
- Players completing other player's requests get rewarded with gold coins + random skip item (amount to determine)
